EPIC: Form enhancements

Value Statements: This forms enhancement prepares way for additional sophistication on the international address verifiers. Since we rely heavily on these verifier tools this single field to expand puts importance on this tool for hoped accuracy. These forms gather essential info for missionaries to contact and send items to. Souls have an opportunity to hear the Gospel of Jesus Christ.

Identify and Research

- A. Obtain Jira ticket clarity - if nothing decide let them know and see if ok
 - a. User story
 - b. Expected (w States) vs Current (w States)
 - c. Edge cases
 - d. Copy
 - e. Design styles (GSVG)
 - f. Scope limitations
 - g. What security vulnerabilities to address and or aware of ?
- B. Review any current documentation for the code/packages
- C. Pattern search for comparing to glean form other parts of code base
 - a. Drawer is maybe same css
 - b. Test functionality in UI if existing
- D. Review examples notate learnings on multiple examples
 - a. Fetchify.com -
 - i. notes:

Steps for pseudocode

1. Take existing [Address](#) block and hide that with css
 - a. Form components -> address block
 - b. If prop for expanding variant
2. Create a CSS transition to open the fields back up
3. Distinguish as English-only feature. [until we figure out all the international address verification stuff]
4. (trigger open) User selects their address in the dropdown of suggested add

on
or

resses

5. (trigger open) Hook up with enter key
6. (trigger open) Hook up with tab key
7. (trigger open) Hook up with Continue btn
8. (trigger open) User autofill the street address
9. Consider edge cases for trade off equation time box

Code

★ FOCUS time boxes- task open and dev tools is all note what got done, REREAD Jira once each time at least

- ☐ 1
- ☐ 2

Manual Functional Test

- ☐ [Accessibility](#) SCORE (note tool)
- ☐ Mobile First
- ☐ Translation
- ☐ Simplicity review
- ☐ Desktop
- ☐ CMS - multiple component check
- ☐ OS core list

Refactor if necessary

- Time spent of fixing or meeting a priority above

Document / Update readme

- Minimum docs

Create PR

- Document in PR description what is being solve
- Link to Jira ticket
- Proper branch name
- Link to CF dev lane demo for cms and or hannah
